

# OUT OF YARD

Northern Ireland's premier  
landscaping supplier

[outofyard.com](http://outofyard.com)

## All the landscaping supplies you need and mulch more

**This must be the best job in the world. After all, we've been doing it for over 25 years.**

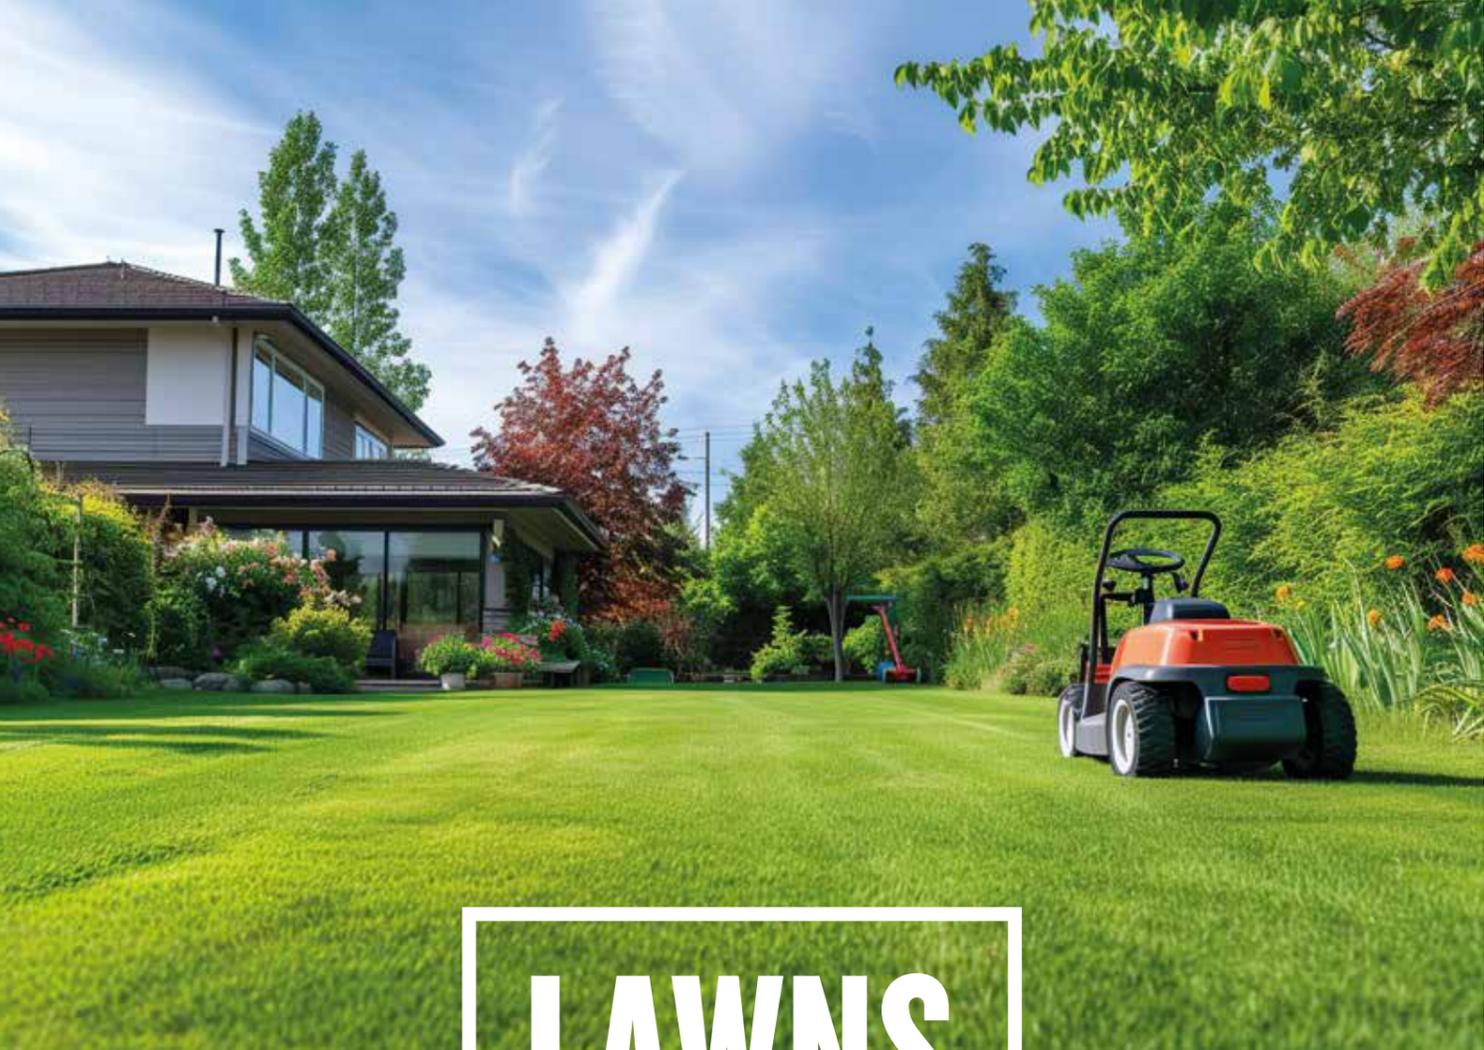

Sourcing and supplying the very best landscaping materials from around the globe. Helping landscapers and gardeners select the very best timbers, stones and composts for their dream garden or landscape make-over. Offering our customers guidance on using our materials to best effect. Delivering everything they need, then watching as it blends together into a beautiful, functional, harmonious new creation.

So, whether you are a landscaper, gardener, farmer or landowner and no matter if your project is large or small scale, we're here to bring your landscaping ideas to life.

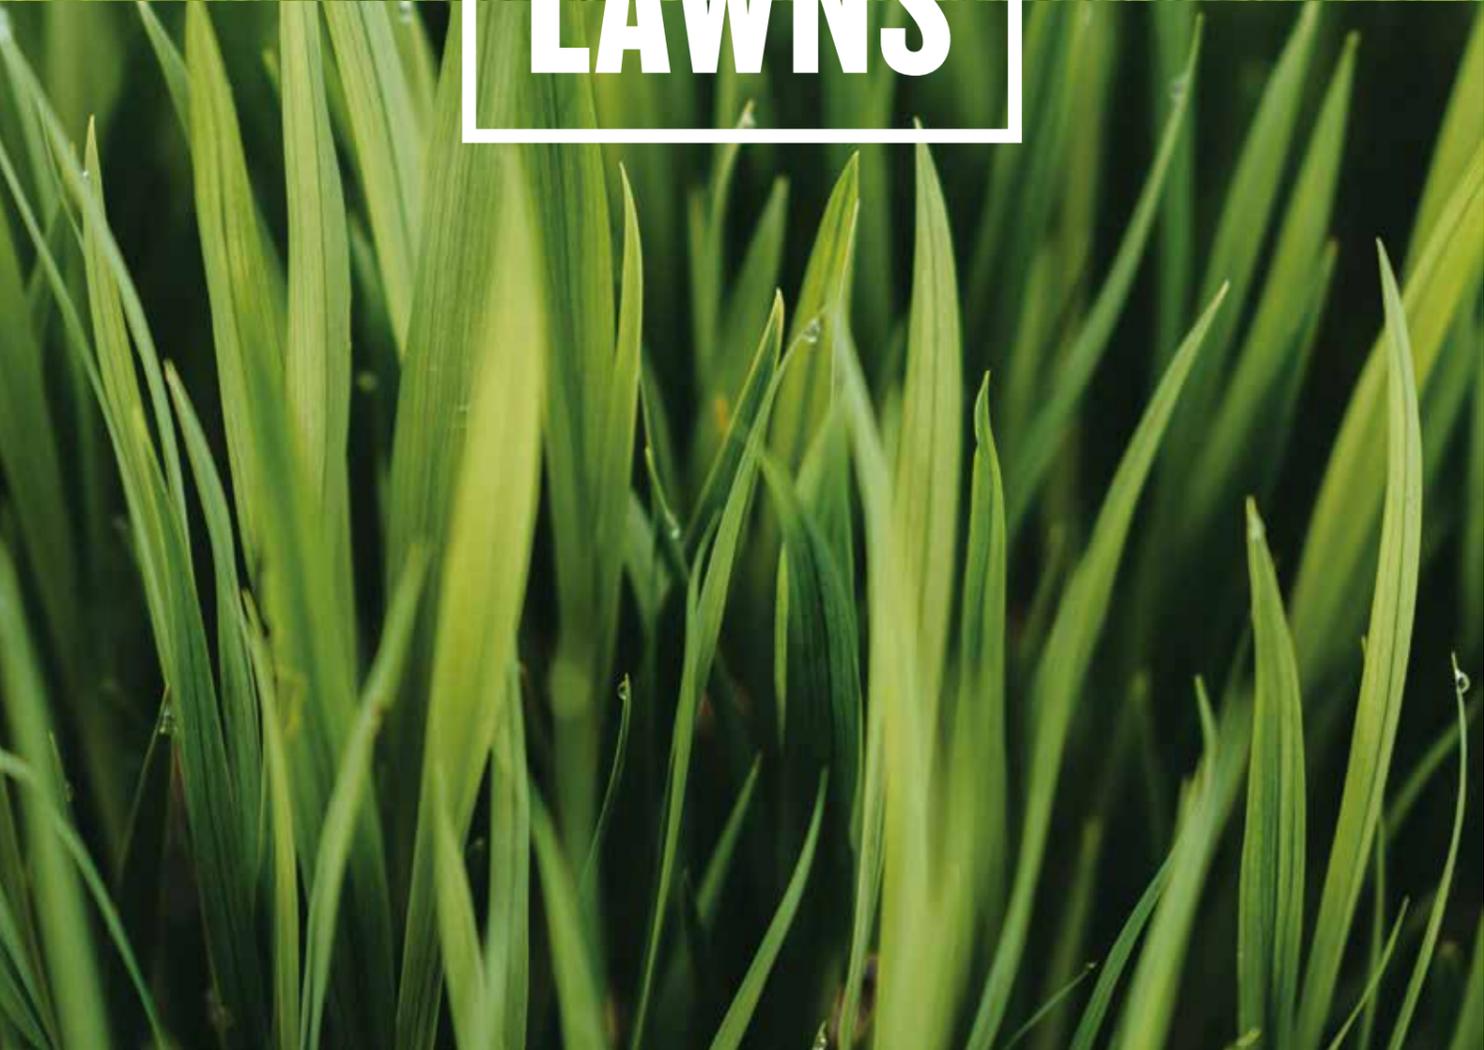

Here's a selection of what's in our Yard:

- > **Railway sleepers**
- > **Decorative stone**
- > **Bark and topsoil**
- > **Fencing**
- > **Construction timber**
- > **Lawn maintenance and garden tools**

# LAWNS

## Show your lawn some love

Well-tended lawns are the centrepiece of our landscaped spaces and gardens.

### Lawn Seed

Choosing the right lawn seed requires some preliminary groundwork. Which type of soil do you have? How will the grass be used? What look do you want? With a wide range of grass seeds to choose from, each with its own special characteristics, the Out of Yard team will help you find the variety that matches your aesthetic, practical and geographic needs.

### Fertilisers

We have many different types of fertilisers, including granular, liquid, and slow-release, each with its own particular application methods and schedules. Choose the right one and your lawn and plants will thrive. But get it wrong...well, we won't go there. The point is you don't need to worry - you're in safe hands with our gardening experts.

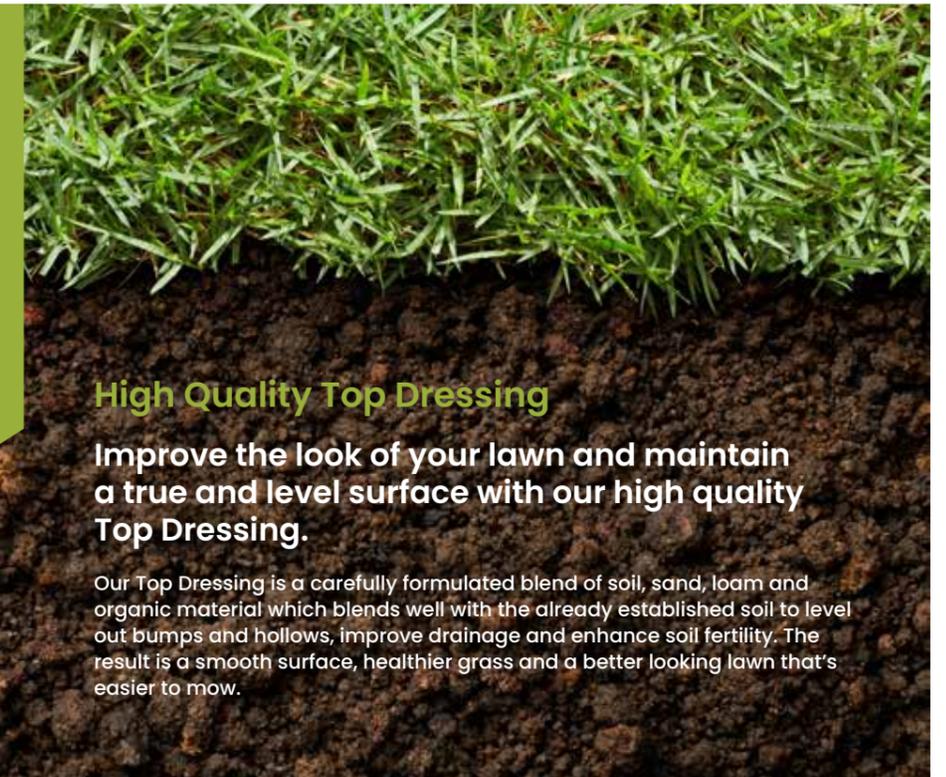

### Moss Killer

Moss has its place. But not in your garden. It loves damp conditions and weak, patchy grass. We can provide a number of products that will kill the moss and fertilise your grass to promote healthy growth. We'll also guide you through a care regime that will prevent future moss from massing and restore your lawn to full vigour.

### Our top tip for your healthy lawn

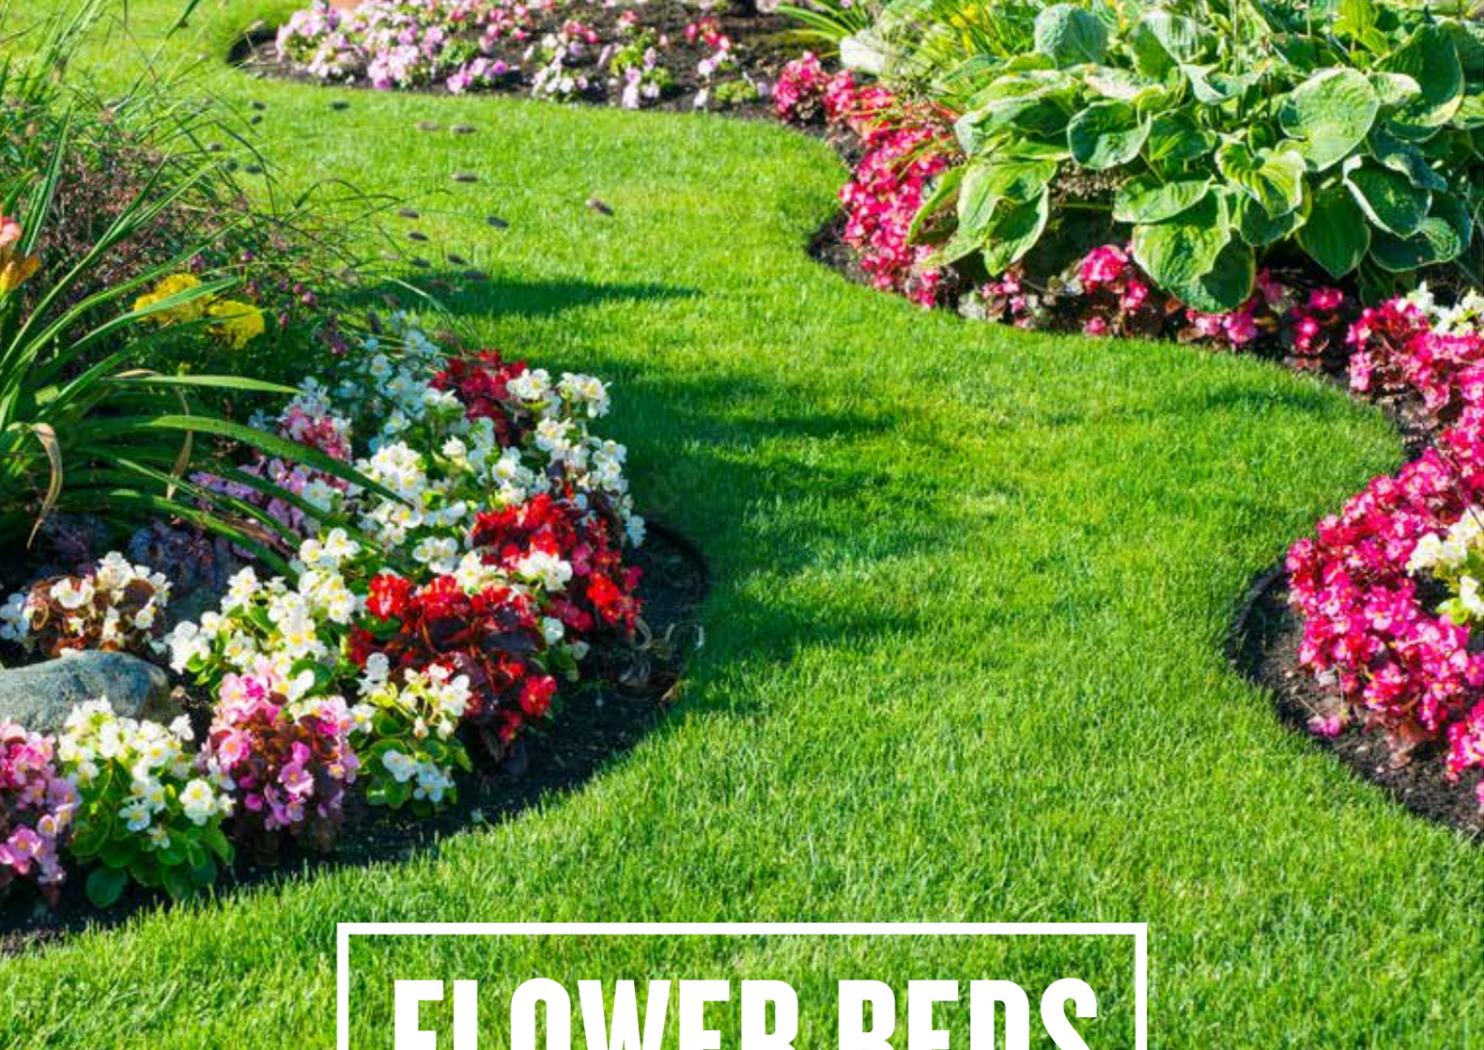

Don't over-mow. Longer grass is healthier and stronger, so by keeping it 7.5-10cm (3-4in) tall you inhibit weed growth, cool the soil and encourage nutrient-producing microbes.

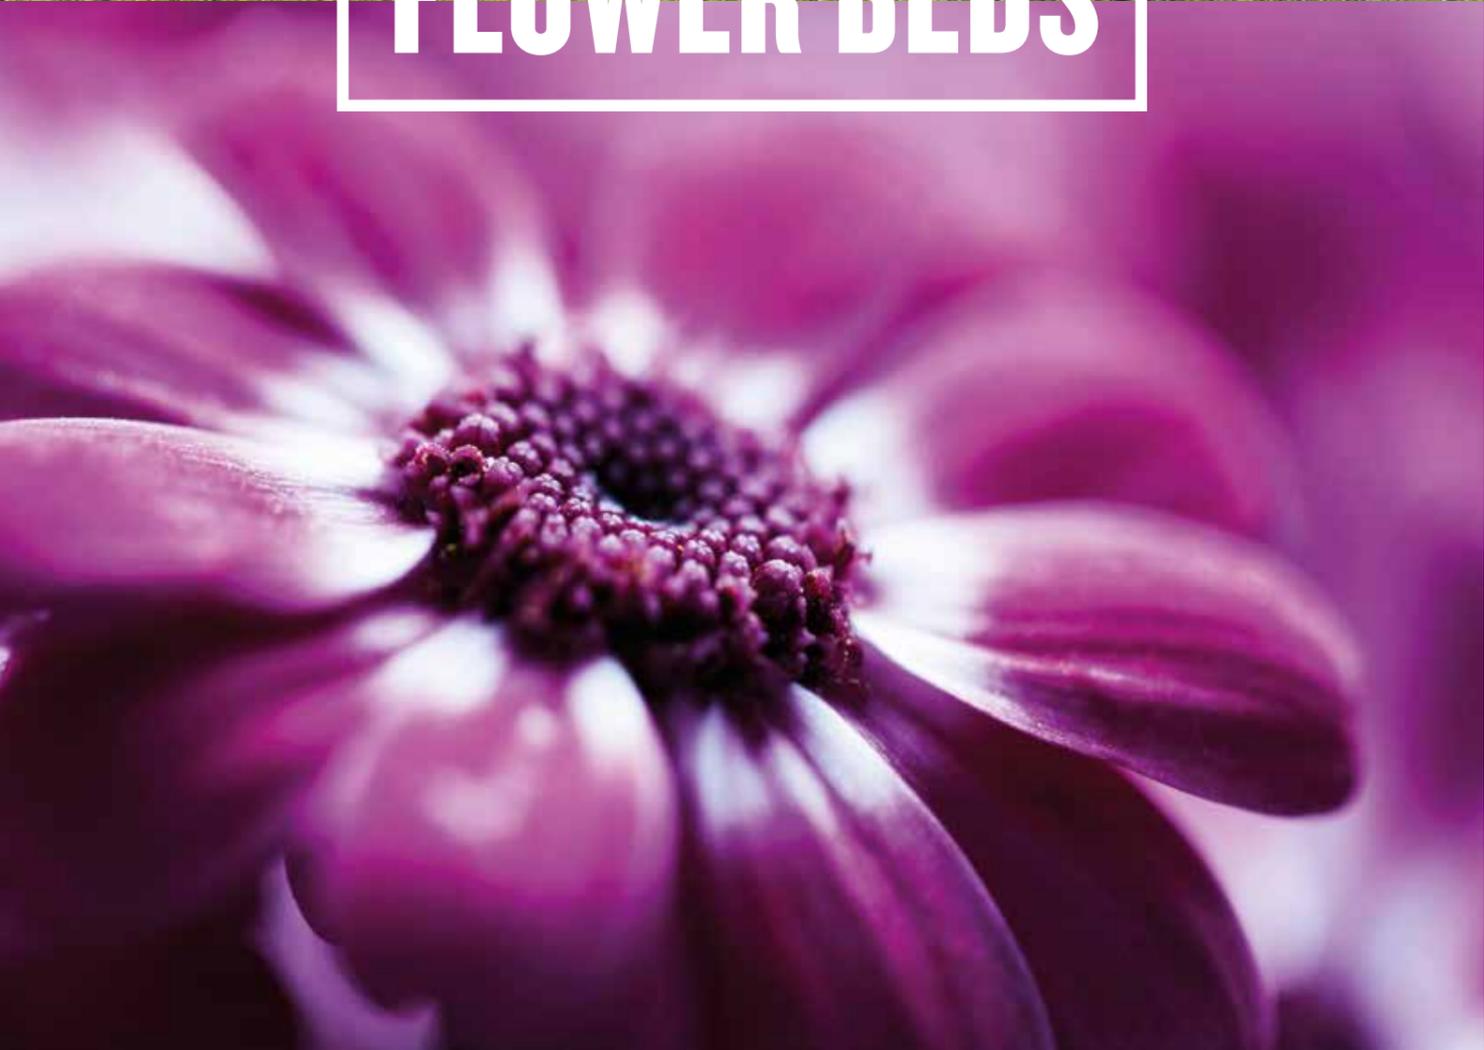

### High Quality Top Dressing

Improve the look of your lawn and maintain a true and level surface with our high quality Top Dressing.

Our Top Dressing is a carefully formulated blend of soil, sand, loam and organic material which blends well with the already established soil to level out bumps and hollows, improve drainage and enhance soil fertility. The result is a smooth surface, healthier grass and a better looking lawn that's easier to mow.

# FLOWER BEDS

## Create beautiful, thriving flower beds

Flower beds and flower gardens are a vital ingredient of a successful, vibrant landscape.

### Bark

It's the perfect finishing touch. Our decorative bark provides a clean visual background that allows your plants and flowers to shine through in all their glory, finishing off your flower beds in style.

#### BENEFITS

- > Bark looks good and is easy to manage.
- > Retains soil temperature and moisture.
- > Repels pests and suppresses weeds.
- > Perfect backdrop for healthy plants and shrubs.
- > Can be used in every season and lasts for years.
- > Eventually breaks down, returning nutrients to soil.

#### Mini Chip Bark

The very attractive appearance of our mini chip bark means it provides a decorative, low-maintenance finish for small borders, tubs and containers. Lay it evenly onto moist soil or compost, at 50 to 100mm (2in-4in) depth and do not disturb it once applied.

#### Fine Bark

An appealing dark brown in appearance and evenly graded to 4mm-10mm (1.5 in-4in), our fine bark has been used by professionals and amateurs for many years. It is an excellent weed suppressant and significantly improves the soil's organic matter content, giving superb results.

### Flowers and Shrubs

Out of Yard has everything you need to lay out new flower beds, and maintain existing ones. Shovels, spades and wheel barrows for the hard work; screened topsoil and sustainable compost for a rich, fertile soil medium; and, attractive, long-lasting bark for the finishing touch. Plus all your fertilisers and weed suppressants.

### Screened Topsoil

Our screened topsoil is a rich, sandy loam that has had all large clods of soil, stones, roots and other materials scrupulously removed. The result is nutrient-rich, refined topsoil, devoid of contaminants and large particles - the perfect finishing layer for any landscaping or garden project.

### Sustainable Peat Free Compost

Using our non-peat compost will not only significantly reduce your landscaping/gardening environmental footprint, it will also provide good drainage, essential nutrients and soil conditioning. Perfect for growing fruits and vegetables and planting trees and shrubs (but not seeds or young plants) it's sure to deliver bloomin' brilliant results!

# Hard Landscaping is easy with Out of Yard

## Reclaimed Sleepers

There's something reassuringly rugged about our railway sleepers, both new and reclaimed. Whether it's lining a driveway, creating a retaining wall or raising a garden bed, they fulfil both functional and decorative purposes and bring a natural, rough-hewn character to your garden or outdoor space.

### FIVE WAYS TO USE RAILWAY SLEEPERS

- Create weathered railway sleeper steps.
- Design a unique, durable deck or patio.
- Make outdoor benches or tables.
- Build paths across a garden space.
- Line a water feature with sleepers.

### Did you know?

Out of Yard handles over 100,000 railway sleepers every year, making us one of the largest specialists in the UK and Ireland.

Railway sleepers are highly adaptable, making them a favourite choice for gardeners, landscape designers, and furniture creators alike. At Out of Yard, we offer an extensive selection of sleepers in different sizes and colours, ensuring we have the perfect match for your project. Our softwood sleepers are typically made from spruce or pine, while our hardwood options are primarily oak, making them ideal for both garden use and outdoor design applications.

# HARD LANDSCAPING

## Decorative Stone and Slate

Our stones come in various sizes, textures and colours so we'll help you to choose one that will look right for your project and will work effectively. For example, you might use beautiful White Marble Pebbles to set off a border, or spread Plum Slate over larger areas to introduce a deep reddish-purple hue.

### Out of Yard Favourites

Forest Flint

Auglish Grey Slate

White Marble Pebble

Ocean Blue Pebble

**Help is at hand**  
 Confused by the choice? Not sure what will work? Need some impartial advice? Our team really know their stuff and they'll help you choose materials that are right for your project. All you have to do is ask.

## Sand & Building Aggregates

Sand and building aggregates are the unsung heroes of landscaping. Rarely taking centre stage, they form the firm base upon which other more prominent design elements are built. They provide the necessary strength and durability that is needed to withstand various weather conditions and they create a drainage layer that allows water to flow away, thus preventing costly flooding and water damage. When used creatively our sand and building aggregates can also add to the aesthetic appeal of a project, creating decorative pathways for example, or adding texture to walls.

### Concrete / Paving Sand

Also known as sharp sand, this coarse granular sand is for laying block paving upon. It also makes an excellent 'stiff' mortar mix for laying all types of patio paving on as well as screeds, renders or concrete.

### Building Sand

As its name suggests this sand is suitable for making mortar, pointing, and brickwork and is widely used in general building and landscaping projects.

### Gravel

Our hard-wearing standard Gravel is ideal for multiple purposes, for example as covering for driveways and lanes or used as a clean stone for drainage. It also offers an attractive alternative to grass when creating paths through gardens or around areas that need extra drainage or sun exposure.

### Quarry Dust

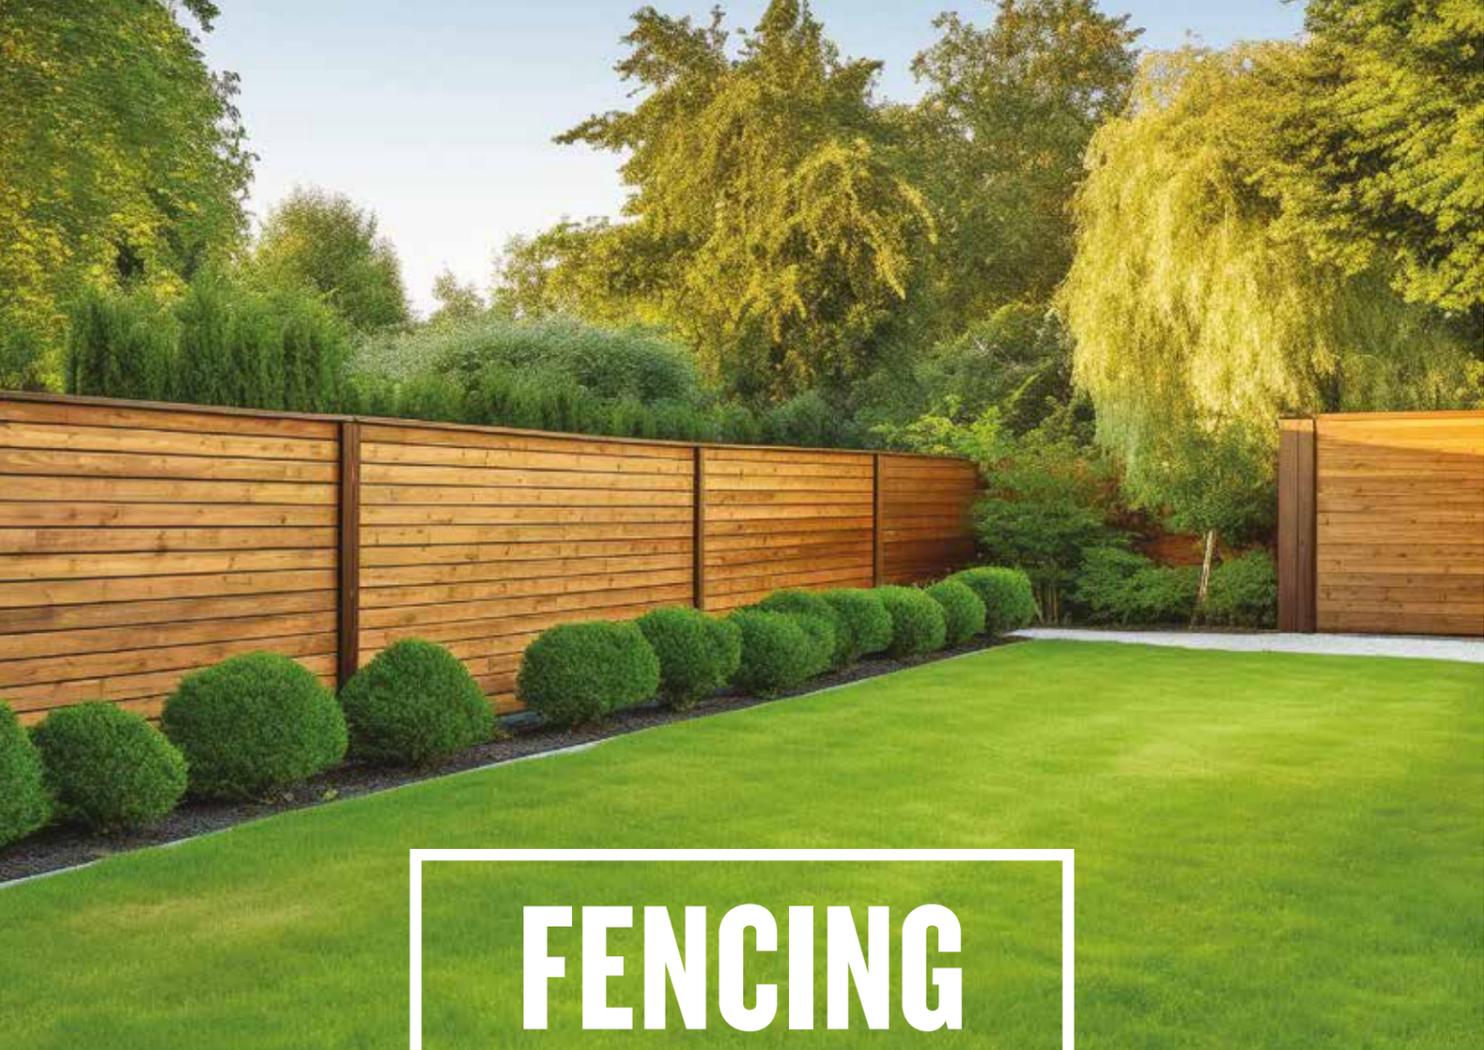

Quarry Dust consists of fine particles of crushed stone chips and dust up to 4mm in size. When compacted over a layer of hardcore it creates a solid, smooth path or driveway. It is also used as a base material for paving stones as well as a medium in which to lay pipes and cables.

### Quarry Rack - Blinding

A dense, coarse material comprising smaller particles of dust and stone, quarry rack (or blinding) is used to provide a smooth, level base for paving and slabs or as fill for raised beds. It also serves as a useful fill for potholes.

**Don't know how much you need?**  
 Contact a member of the Out of Yard team and they will be happy to help you work it out.

# FENCING & DECKING

## Fencing & Decking

### Fencing

Robert Frost was right when he wrote, "Good Fences Make Good Neighbours". We believe that fencing should form a natural boundary around your home or within your landscaping project. Moreover, your choice of fencing should be in keeping with the overall form, style and aesthetics of your gardening scheme. That is why our fencing panels, boards, posts and gates are designed with quality, durability and eye-catching details in mind.

#### Solid protection for your home's boundary.

Our excellent pressure-treated posts and panels offer years of guarantee against rot.

We supply a range of postcrete and multi-purpose cement to make installing your fence quick and easy.

### Impressive details make all the difference

- > D Rail Fencing
- > Bevelled Fencing Rail
- > Fence Board Round Top
- > Fence Board Flat Top
- > Premium Curved Trellis Gate
- > Premium Square Trellis
- > Top Fence Panel
- > Square Fence Posts
- > Gate Posts

## Decking

A well-designed decking area can completely elevate your garden, allowing you to enjoy it throughout the year. We offer a superb choice of decking boards, joists and fittings to help you create an attractive, versatile and long-lasting deck in your garden. Our timber decking is straightforward to install and blends seamlessly between your indoor and outdoor areas. Made from the finest European Pine, it is deep treated for enhanced durability, with grooved surfaces to help prevent slipping, whatever the weather.

### NOT ALL SCREWS ARE EQUAL!

Using screws with a high corrosion resistance is crucial to a long-lasting deck. But don't worry. We can supply everything you need.

## Construction Timber

We have a range of versatile and long-lasting timbers which come in a range of sizes and are ideal for general building works. Our C16 timber is pressure-treated to ensure resistance against fungi, insects and moisture and is ideal for both general construction and leisure timber applications such as fencing, pergola posts and timber cladding.

## YOUR ONE-STOP DIY SHOP

At Out of Yard we're here to help you tackle any project with ease and confidence. Whether you're sprucing up your home, tending to your garden, or diving into a DIY masterpiece, we've got everything you need—all in one place.

# OUR SERVICE

## Our service is all about our customers

Our landscaping materials, product knowledge and technical know-how have one key purpose – to help you design and build beautiful landscapes and gardens. Here's how we do it:

### > Quality and choice

We focus on our customers' needs, then we scour the world to source and stock landscaping and gardening products that will precisely fulfil their groundwork requirements. All of this delivered with a service that exceeds every expectation.

### > Help on site

With the Out of Yard team on hand, there's no need to ever struggle over which product to choose, how much to order or how best to use it. We have decades of experiences, insights and knowledge and we're more than happy to share all of it with you, irrespective of the scale or complexity of your project.

### > Prompt, reliable delivery

We dispatch single pallet and larger items throughout Northern Ireland. We will always strive to meet your delivery requirements, subject to unforeseen access restrictions or surface hazards.

### > Shop at your leisure

You are welcome to browse the Out of Yard shop, situated just where you enter the Yard. You'll find a wide range of competitively priced indoor and outdoor landscaping and gardening supplies, including fastenings, hand tools, garden tools, etc.

## PUTTING SUSTAINABILITY FIRST

We curate our entire product range to ensure that, where possible, all of the materials and items we supply are sustainable, non-toxic and environmentally friendly. Our products will allow you to create landscapes and gardens that are in harmony with the environment, protecting wildlife and biodiversity.

## What our customers say

**Hugh Martin McAlary**  
Greenacres NI, Maghera

*Our introduction to Out of Yard came through a referral from another landscaper and I must say it has built into a successful relationship. They're our go-to provider for landscaping supplies - everything from mulch and grit to sleepers and timbers. We know we can trust them to deliver what we need, when we need it. Out Of Yard's service and products are top quality and won't be beaten. They really go out of their way to help, whether it's for a last-minute delivery, the occasional smaller order and sometimes splitting a load to suit site requirements. That really makes a difference in the world of landscaping and it's why I'll keep using Out of Yard.*

**Noel Sweeney**  
Sweeney Landscape Design, Belfast

*Why do we use Out of Yard? It's because they understand and share our focus on sustainable, biodiverse landscape design and our rigorous attention to detail. Also, like us, they're fixated on the quality of their products and services, which means they're constantly innovating and are extremely accommodating to deal with. It's a potent mix and it explains why we know we can rely on them for so many elements of our landscaping. And as far as I'm concerned, we'll continue to do so.*

**Phill, Yew Cottage\_Garden, Magherafelt**

*I'd known the Out of Yard team in a professional capacity for some time, so when I began my Yew Cottage Garden journey, it seemed only natural to call on their services. It has proven to be an excellent decision. Whether it's the quality of their mulch and hard landscaping products, their exemplary service or their flexible, customer-focused approach, every touch point with Out of Yard is of the highest standard. Plus, they share my passion of soft & hard landscaping. I get regular updates from them on new trends & new products and new, or innovative ideas they have come across. I really can't recommend Out of Yard highly enough.*

**Brian Corbett**  
Brian Corbett Garden Design, Whitehead

*"We have used Out of Yard to supply bark for a number of high-end landscaping projects and they have performed impeccably in every case. Their products are very high quality and they deliver promptly and carefully. But the manner in which they fulfil each project for us is equally important. As well as being well informed and thoroughly professional, the Out of Yard team brings a genial, social quality to their work, so they get on well with both our clients and other contractors on site. This reflects well on us and helps towards a successful project outcome."*
